

# UJ HOT WATER SOLUTION MAURITIUS LE SERCOUF HOTEL

## RECENTLY INSTALLED A 8000L SYSTEM IN MAURITIUS

We take great pride in this new addition to our commercial installations.

Supplying 8 000L hot water to a 62 apartment Hotel on the east coast of Mauritius

Plant consists of 1 x 8 000L fiber glass heat exchange tanks connected to 2 x 45 Kwatt output heat pumps

## ON-SITE ASSEMBLY OF TANKS

It took us 4 days to complete tank and heat pump assembly.

---

*1 x 8 000L tanks capable of producing over  
every 24 hours*

---

*24 000L hot water*

## **FUTURE PROSPECTS**

With our fiber glass tank technology, we are providing energy efficient hot water at a fraction of the cost of conventional element boilers, we cut electricity usage by over 60%.

We have since this installation supplied 5 other major hotels with hot water systems similar to this one, EMS has decided to open a permanent branch in Mauritius to cater for the over 200 new hotels being developed over the next few years.
